Using online homework to study student behavior and study habits

Monday, March 7
2:30 p.m.
Taylor 111

Megan Nieberding
Ohio State University

For this talk I will briefly discuss my thesis work on the factors that impact student procrastination on online homework assignments in the introductory physics courses.

I will also discuss the curriculum developed for the introductory physics classes that improves the accuracy and response time of basic skills essential for solving physics problems in the intro courses.
