THE COLLEGE OF WOOSTER

Research Experience for Undergraduates (REU)
Physics, Chemistry, & Materials Science
The College of Wooster, Ohio
May 24 - July 23; $6,800

- Engage in exciting physics research: projects in astrophysics, chemical physics, critical state granular matter, quantum optics, solar energy materials, and swellable organosilica.
- Develop professional skills in research ethics, science communication, and technology.

- Wooster's faculty are experienced mentors for undergraduate research.
- Many of our student participants have completed just one year of college.
- Two-thirds of participants typically present their research at conferences and/or publish in peer-reviewed journals.

Apply on ETAP!

Application will open in December.
